

Radio Talk Group Folder Changers for Sepura SRC3300 and SRG3500

Product Description

The NC6010 range is designed to provide a rugged, dedicated, low cost talk group folder changer for Sepura radios. These products are small, light weight and easy to use.

The NC6011 is for use with the SRG3500 and is a similar footprint to the NC6010.

The NC6012 is a discrete micro controller built into a car key fob for use with the SRC3300.

When it is necessary to change the talk group folder simply plug the NC6010/11/12 into the radio via the PEI port and it automatically switches on and shows the talk group folder in use. Then use the three control buttons provided to select the talk group folder required. The display shows the talk group folder selected or in use.

Features

- Rugged construction for field operation
 - Dedicated tool
